architectural recessed downlighting

the specifier's choice for architectural downlighting

Precision design with a two-stage reflector system producing a smooth distribution with excellent glare control and low aperture brightness. The recessed downlights are available in multiple lumen packages, color temperatures and a variety of finishes. Standard 0-10V driver dims to 1% and a multitude of optional drivers are available. Creating the perfect atmosphere is easy with these low glare downlights that offer a variety of color control and connected options.

enabling complete application design with a comprehensive line of products that provide the highest quality of light to maximize comfort in commercial spaces.

High-Performing Optical System

Taking a total systems approach, Portfolio LED downlight components are specifically engineered for the latest in LED technology, ensuring optimal luminaire efficacy and quality performance.

Thermally Optimized

The integrated LED design provides quality thermal conductivity of the LED to the die cast thermal assembly ensuring optimal thermal management and maximum efficacy.

Superior LED

Portfolio's advanced LED system contains a plurality of high brightness white LEDs, producing a quality high lumen light source with reliable color consistency.

Precision Optics

Precisely engineered for use with LED technology, the highly transmissive transitional lens diffuses undesirable source brightness and evenly distributes light across the entire lens.

Visual Comfort

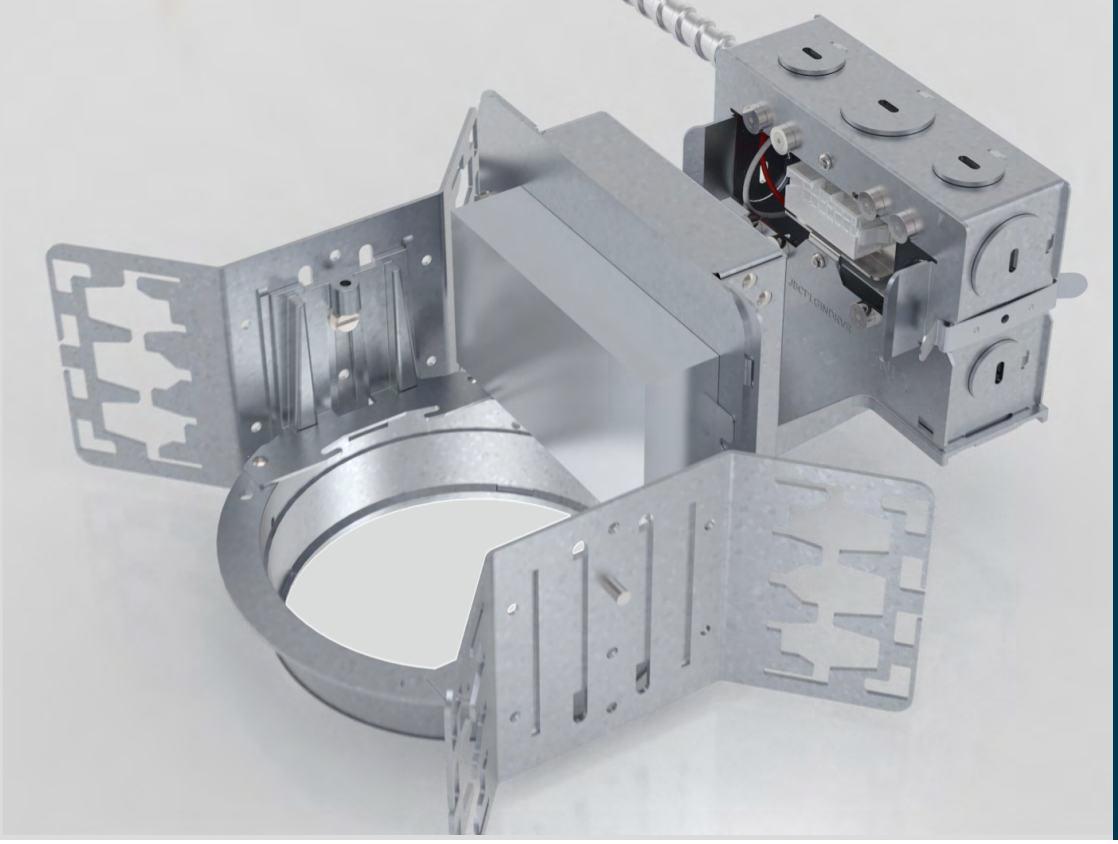

Lower reflectors are designed to provide aesthetically pleasing performance with equal cut-off to lens and lens image, and are available in all of Portfolio's standard finishes.

Product Certifications & Features

ENERGY STAR · RoHS COMPLIANT · UL CERTIFIED · CHICAGO PLENUM APPROVED · wet location · D2W · powered by fifthlight technology · VividTune color tuning solutions

- Available lumens
  - 4" = 250 – 7500 lumens
  - 6" = 250 – 15,000 lumens
- 90, 97 & 98 CRI
- 2400, 2700, 3000, 3500, 4000, & 5000 CCT
- Dim to warm and tunable white
- 8 driver options
- Multitude of reflector options
- Available remote and plug in driver for ease of maintenance
- Integral or remote battery back up
- Emergency transfer device

Plug-in Driver

Plug in driver with magnetic snap in attachment method eases replacement in hard ceilings.

Reflector options

Round

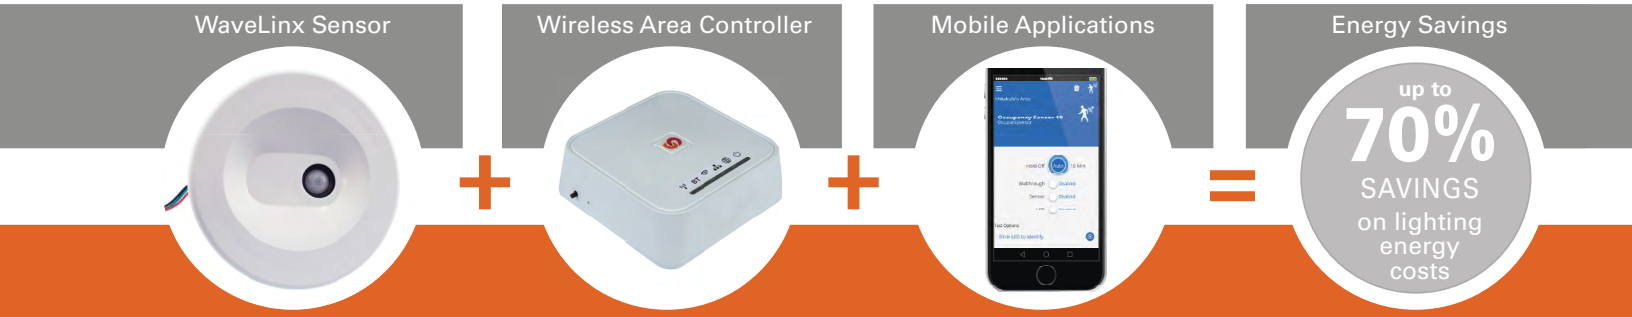

- Narrow spun aluminum
- Medium spun aluminum with 45° or 50° cutoff
- Wide spun aluminum
- Medium beam hyperbolic
- Non-conductive shallow
- Die cast shallow
- Single, double, and corner open wall wash
- Single and double lensed wall wash

Square

- Medium adonized aluminum with 45° or 50° cutoff
- Die cast shallow
- Lensed wall wash

Connected solution

WaveLinx

Wireless Connected Lighting System

- Adjustable occupancy detection and daylight harvesting control
- Simple, secure wireless connectivity with out-of-the-box code compliance
- Easy to use mobile application allows for fast set up and unlocks advanced control capabilities

Take compliance, network security and energy savings into your own hands.

Automatic code compliance. 7-Tier network security features.
Integrated wireless sensors to collect and transmit key building data.
And, the ability to control your system from a mobile app and the ability to exchange data with third party applications.

It's simple: WaveLinx just works.

Color control

VividTune™
color tuning solutions

VividTune fine tuning of light

Whether you're looking to optimize productivity or simply add dramatic flair, VividTune's tunable white technology allows you to adjust the color temperature from warm white to cool white, creating an environment that fosters productivity and concentration.

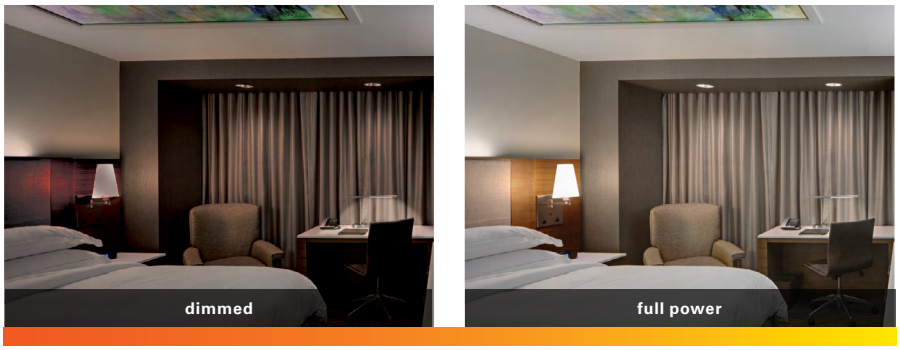

light intensity

D2W™

D2W™ Dim-to-warm solution

Bring the warm, dim glow reminiscent of traditional incandescent and halogen sources into your space, for a fraction of the energy consumption, with our dim-to-warm solution.
