

Simplify installations with the most compact Combination Service Entrance Device (CSED)

Square D QO and Homeline 300 A/400 A CSEDs

Smarter installs start here.

Square D™ QO™ and Homeline™ 300 A/400 A CSEDs combine the meter socket and outdoor disconnect into a single, compact, lightweight enclosure, designed for plug-on neutral circuit breakers. Each enclosure features an integrated load center, offering flexible options to stay compliant with evolving code requirements (AFCI, GFCI, and surge protection).

Built with future-ready flexibility, these CSEDs support alternate power sources such as solar, generators, and battery storage.

Schneider
Electric

Powerful features. Minimal footprint.

The 300 A/400 A CSED combines a compact design and plug-on neutral technology for easy installation.

Easy installation

Compact, lightweight enclosure includes meter socket, main outdoor disconnect and load center

Plug-on neutral interior located on top of enclosure for easier breaker wiring

Customizable

Surface, semi-flush, and combo mounting styles available

Solar, generator, and battery-ready with bussing rated up to 225 A

Field installable main offers maximum design flexibility

Compliance

NEC-compliant compartmentalization

Two-piece dead front allows easy access to mains/interiors while avoiding energized components
